- September Crop Report
- Supply & Disappearance
- Crop and Pasture Conditions

Dear Nebraska Farmers, Ranchers and Agribusinesses:

The following narrative and tables are from recently published reports by USDA's Agricultural Statistics Board. These data are direct results of information provided by Nebraska producers and agribusinesses to the surveys conducted each month by this office.

Thank you for your response to these surveys.

Dean C. Groskurth
Director

Crop Summary

Nebraska corn production based on conditions as of September 1, 2010, is forecast at 1.53 billion bushels, 1 percent below last month and 3 percent below last year. Yield is forecast at a record high 179 bushels per acre, 1 bushel below last month. Soybean production is forecast at a record high 294 million bushels, up 4 percent from last month and 13 percent above last year. Yield is forecast at 55 bushels per acre, up 2 bushels per acre from August and .5 bushel above the 2009 record high. Sorghum production is forecast at 6.1 million bushels, unchanged from the August forecast but down 53 percent from last year. Yield is forecast at 94 bushels per acre, unchanged from the previous month but 1 bushel above a year ago.

U.S. corn production is forecast at a record 13.2 billion bushels, based on September 1 conditions, down 2 percent from August's forecast but up from the previous record of 13.1 billion bushels set in 2009. Yields are expected to average 162.5 bushels per acre, down 2.5 bushels from August and 2.2 bushels below last year's record of 164.7 bushels. Soybean production is forecast at a record high 3.48 billion bushels, up 1 percent from August and 4 percent above 2009. Yields are expected to average a record high 44.7 bushels per acre, up 0.7 bushel from last month and last year. Sorghum production is forecast at 376 million bushels, 2 percent below last month and last year. Yield is forecast at 72.7 bushels per acre, down 1.4 bushels from August but up 3.3 bushels from last year.
